

AMENDMENTS TO THE ABSTRACT OF DISCLOSURE

Please replace the entire page 15 with the following rewritten paragraph:

--ABSTRACT OF THE DISCLOSURE

A receiver configured to receive signals corresponding to spread spectrum information symbol streams by pseudorandom binary sequences includes at least one channel ( $V_1$ ) with an adapted filter (20) and with a symbol clock signal ( $H_s$ ) recovery circuit (12) and other channels ( $V_2, \dots, V_k$ ) with a sliding correlator ( $30_2, \dots, 30_k$ ) using the symbol clock signal ( $H_s$ ) produced by the channel ( $V_1$ ) with adapted filter. --
